

# MAWSON INFRASTRUCTURE GROUP INC. EXECUTES NEW CUSTOMER CO-LOCATION AGREEMENT

*Posted on December 19, 2023*

Mawson Infrastructure Group Inc. (NASDAQ:MIGI) (“Mawson” or the “Company”), a digital infrastructure provider, announced today its unaudited business and operational update for June 2023.

*New Customer Agreement for 1,764 miners or approximately 6 MW with Provision for Expansion*

*Full Deployment Expected to be Completed by Year-end*

*Once Completed, Mawson expected to have total capacity of 35,624 miners or about 109 MW with hashing capacity of approximately 3.8 EH/s1*

**PITTSBURGH, Dec. 19, 2023** -- Mawson Infrastructure Group Inc. (NASDAQ:MIGI) (“Mawson” or the “Company”), a digital infrastructure company, is pleased to announce that the Company has signed a new customer co-location agreement between a wholly-owned

subsidiary of Mawson and Krypton Technologies LLC (“Krypton”).

The new customer co-location agreement executed between Mawson’s CEO and Krypton’s Managing Partner on December 13, 2023, is for Mawson to provide Krypton with co-location services for 1,764 miners or approximately 6 MW at Mawson’s Midland, Pennsylvania facilities. Initial co-location customer agreement term is for 12 months, and the parties can extend upon mutual agreement. The co-location customer agreement also provides flexibility for future potential capacity expansion.

*Rahul Mewawalla, Mawson’s CEO and President, commented, “We are extremely pleased to sign and welcome another co-location customer, which we expect to contribute further to the growth of our co-location business next year. We are excited about the recent successes in our co-location business combined with the growth we have driven in our self-mining business, along with our increased capabilities in our energy management business, as we look to 2024 ahead.”*

*David Huang, Managing Partner of Krypton Technologies LLC, stated, “We were impressed with the Mawson facilities and organization, and are looking forward to being a customer of Mawson’s co-location business and their platform capabilities. We are looking forward to working with Mawson on a deployment by year-end and potentially extending our relationship further.”*

The Krypton agreement executed in December further increases Mawson’s co-location

business in addition to the growth that Mawson’s self-mining business has driven in recent months. In October, Mawson signed a customer co-location agreement with a wholly owned subsidiary of Consensus Technology Group LLC (“Consensus”) for Mawson to provide co-location services for 15,876 miners or approximately 50 MW. The Consensus deployment was completed by Mawson in mid-November, and the Krypton deployment is expected to be completed by the end of December. Mawson anticipates its Midland, Pennsylvania facilities operating at a capacity of 100 MW with the combined potential for self-mining and co-location fleets at its Midland facilities comprising approximately 32,900 miners and 3.6 EH/s. In addition to its facilities at Midland, Mawson has other facilities in Bellefonte, Pennsylvania, which is used entirely for self-mining purposes. As of the end of November 2023, the Bellefonte facility was operating at approximately 8.8 MW of capacity with approximately 2,720 self-miners hashing. With self-mining and the total co-location platforms combined, Mawson’s facilities are expected to have a capacity of about 109 MW and about 35,624 miners along with a total hashing capacity of approximately 3.8 EH/s.

#### About Mawson Infrastructure Group

Mawson Infrastructure Group (NASDAQ: MIGI) is a digital infrastructure company. Mawson’s vertically integrated model is based on a long-term strategy to promote the global transition to the new digital economy. Mawson aligns digital infrastructure, sustainable energy, and next-generation fixed and mobile data center solutions, enabling efficient Bitcoin production and on-demand deployment of digital infrastructure assets. Mawson Infrastructure Group is emerging as a global leader in ESG focused digital infrastructure and Bitcoin mining.
