

# **MAWSON INFRASTRUCTURE GROUP INC. EXECUTES NEW CUSTOMER AGREEMENT WITH CANAAN INC., GROWING AND EXPANDING DIGITAL COLOCATION BUSINESS WITH LATEST- GEN ASICS**

*Posted on March 25, 2025*

On March 21, 2025, Mawson Infrastructure Group Inc. (the “Company”) and Canaan Inc., a NASDAQ-listed publicly traded company, executed a Master Colocation Agreement (the "Agreement"). The Agreement has an initial term of three years, and the parties can extend upon mutual agreement. Under the terms of the Agreement, Mawson will provide approximately 64 MW of colocation capacity at the Company's facilities. The Agreement includes provisions for digital colocation services.

**MIDLAND, Pa., March 26, 2025** -- Mawson Infrastructure Group Inc. (NASDAQ: MIGI) (“Mawson” or “the Company”), a publicly-traded technology company focused on digital infrastructure platforms for artificial intelligence (AI), high-performance computing (HPC), and digital assets markets, today announced that it has signed a significant new digital colocation customer agreement with Canaan Inc., a NASDAQ-listed publicly traded company (NASDAQ: CAN), further growing and expanding its digital colocation business with latest-generation application-specific integrated circuit machines (ASICs).

The new customer colocation agreement executed between Mawson’s President and CEO Rahul Mewawalla and Canaan’s Chairman and CEO Nangeng Zhang on March 21, 2025 is for

Mawson to provide Canaan with digital colocation services for about 17,453 latest-generation ASICs at Mawson's facilities. The initial agreement term is for 3 years and the parties can extend upon mutual agreement. The contract also provides for future potential capacity expansion.

Rahul Mewawalla, Mawson CEO and President, stated, *"We recently announced that we grew our digital colocation business revenue 136% year-on-year. We are now pleased to sign and welcome Canaan as our newest enterprise-grade customer. I am delighted to announce this new long-term digital colocation customer agreement, further driving growth of our digital colocation services business. This aligns well with our strategy of optimizing our digital infrastructure and compute management capabilities working with latest-generation machines. By combining Mawson's digital infrastructure innovation and Canaan's latest hardware innovation, we're creating a strategic relationship that we expect will benefit both companies and the overall ecosystem."*

Nangeng Zhang, Chairman and Chief Executive Officer of Canaan, commented, *"This agreement between Canaan and Mawson combines Mawson's digital infrastructure and operational excellence with Canaan's next-generation mining hardware to create an innovative, scalable foundation that provides the flexibility for additional opportunities. Together, we're building a partnership that we believe will drive value and create opportunities for sustainable growth for both companies."*

The executed customer agreement, entered into by wholly owned subsidiaries of Canaan Inc. and Mawson Infrastructure Group Inc., is for approximately 64 MW of compute capacity at Mawson's facilities. This further strengthens Mawson's position as a leading industry provider of digital infrastructure and digital colocation services in the attractive PJM market, one of North America's largest competitive and deregulated wholesale energy markets.

Upon completion of this deployment, Mawson expects to operate and manage approximately 5.51 exahash per second (EH/s) in combined total current operating hashrate across its facilities.

Mawson also has an additional site in Ohio under development which is expected to add an initial 24 MW to the Company's currently operating 129 MW across its facilities, growing the Company's total operating capacity to 153 MW upon completion, potentially further expanding the total hashrate.

### **About Mawson Infrastructure**

Mawson Infrastructure Group (NASDAQ: MIGI) is a technology company that offers digital infrastructure platforms for artificial intelligence (AI), high-performance computing (HPC) and digital assets. The Company's digital infrastructure platforms can be used to operate computing resources for a number of applications, and are offered across artificial intelligence (AI), high-performance computing (HPC), digital assets, and other computing applications. Our innovation, technology, and operational expertise enables us to operate and optimize digital infrastructure to accelerate the digital economy. The Company has a strategy to prioritize the usage of carbon-free energy sources, including nuclear energy, to power its digital infrastructure platforms and computational machines.
